Executive Summary

Each year, the MetLife Mature Market Institute conducts a market survey of nursing home and assisted living costs in the United States. The 2007 survey was conducted by telephone in 87 major markets in all 50 states and the District of Columbia by LifePlans, Inc., a risk management and consulting services firm. To enhance the opportunity to readily compare costs, the 2007 market data for nursing home costs is combined with the data for assisted living in one report. In addition, the assisted living market data includes costs broken out by size of the facility for two types of additional services which can significantly increase costs.

Daily private pay rates for long-term (custodial) nursing home care were obtained for private and semi-private rooms in licensed facilities throughout the market area. Monthly private pay base rates, which are defined as room and board and typically at least two meals per day, housekeeping, and personal care assistance, were obtained for one-bedroom apartments or private rooms with private baths in assisted living communities.

Daily nursing home rates range considerably by region. The Baton Rouge, LA area had the lowest rates for a private room in a nursing home averaging \$123 per day, and Alaska the highest averaging \$510 daily. For a semi-private room, the Shreveport, LA area was the lowest, with an average daily rate of \$115, and Alaska the highest averaging \$504 per day.

Assisted living rates also ranged considerably by region, with Indianapolis, IN the lowest (\$1,963 monthly) and the Washington, DC area the highest (\$5,031 monthly).

National Findings*

Nursing Home Base Rates

- The national average daily rate for a private room in a nursing home is **\$213**, or \$77,745 annually, an increase from \$206 or \$75,190 annually in 2006.
- The national average daily rate for a semi-private room in a nursing home is **\$189**, or \$68,985 annually, an increase from \$183 or \$66,795 annually in 2006.

Assisted Living Base Rates

- The national average, private pay monthly base rate for an individual residing in an assisted living community is **\$2,969** or \$35,628 annually. This is essentially unchanged from 2006 with **\$2,968** and \$35,616, respectively.
- Fifty-nine percent of assisted living communities provide dementia care services. Of those, 54% charge additional fees for dementia-related care with an average additional monthly cost of \$1,110. The average monthly rate for those facilities charging additional fees for Alzheimer's and dementia care is \$4,270, or \$51,240 annually.

**All cost averages in this survey are rounded to the nearest dollar.*

Overview

Nursing home care and assisted living services represent adjoining levels of the care continuum. A nursing home provides room, meals, skilled nursing care, and medical services to residents with chronic conditions requiring permanent care or for those needing a recovery period after hospitalization. Typically, patients in long-term care facilities require assistance with multiple Activities of Daily Living (bathing, dressing, eating, toileting, transferring in and out of chairs or beds, and continence), and/or have cognitive limitations due to Alzheimer's disease or another form of dementia.

In the continuum of care, assisted living bridges the gap between home care and nursing homes. It provides services for those who are not able to live independently, but do not require the level of care provided by a nursing home. Residents of assisted living communities may need personal care assistance with Activities of Daily Living (ADL) and household chores, and/or require supervision due to a cognitive impairment.

The 2007 market survey reports on private pay daily rates for nursing homes and monthly base rates for assisted living communities in 87 major markets across the United States.

Nursing Homes

Admission to a nursing home could be for short-term rehabilitation services, but for many Americans, the move to a nursing home is a permanent one. The nursing home resident may have a chronic condition or a cognitive impairment that prevents him or her from living independently and which requires skilled nursing services. Nursing homes provide a secure environment and an array of services to meet the physical, medical, and social needs of its residents.

Services provided at nursing homes typically include:

- Room and board
- Medication management
- Personal care (assistance with ADLs)
- Social and recreational activities

Size

According to data from various National Nursing Home Surveys (the 2004 National Nursing Home Survey is the most recent one publicly available from CDC's National Center for Health Statistics¹) the number of nursing homes increased 10.2% during the period 1973-74 to 2004, growing from 15,700 to 17,300 facilities. Comparisons with 1999 data indicate that there were somewhat fewer nursing homes in 2004, but the number of beds per facility has increased during that time. The number of beds grew 46.9% from 1,177,300 to 1,730,000, suggesting a greater number of beds per home. In 2004, homes averaged 108 beds but, as the table below shows, the capacity of nursing homes has changed over the years, with 79.8% currently in the 50-199 bed category.

Nursing Home Bed Capacity				
Years	Nursing home number of beds			
	Fewer than 50	50-99	100-199	200 or more
1973-74	40.8%	35.0%	20.4%	3.8%
1977	42.3%	30.7%	22.2%	4.8%
1985	33.2%	32.5%	28.1%	6.2%
1995	16.8%	35.6%	40.1%	7.5%
1997	12.9%	37.2%	42.2%	7.7%
1999	11.5%	38.7%	41.8%	8.0%
2004	13.9%	37.3%	42.5%	6.2%

Source: CDC/NCHS, National Nursing Home Survey, selected years.

Resident Population

The number of residents grew 38.7% during this same period from 1,075,800 to 1,492,200. Almost 27% of nursing homes now offer special Alzheimer's or dementia units for specialized care.

The age distribution has also changed, as the chart below depicts.

Nursing Home Residents by Age Group

Source: Decker FH. *Nursing homes, 1977-99: What has Changed, What has Not?* Hyattsville, Maryland: National Center for Health Statistics. 2005.

Nursing Home Population Characteristics

The growth in the over age 85 population in nursing homes mirrors that of the U.S. population in general, where this age group grew from a total of 4,240,000 in 2000 to 5,096,000 in 2005, a 20% increase.²

With the availability of alternative long-term care settings such as assisted living and increasing home care options, residents in nursing homes tend to be older and frailer. Of current nursing home residents, 72% are women, and only 9.7% of all residents are under the age of 65.³ As the chart that follows shows, 86.3% of current residents aged 65 years and older need help with 3 or more ADLs.

Source: *Nursing Home Use by "Oldest Old" Sharply Declines*, The Lewin Group, 2006.⁴

Length of Stay

Almost 56% of current nursing home residents have been there for at least one year:

Nursing Home Stay	
Less than 3 months	20.0%
3 to 6 months	10.0%
6 months to less than 12 months	14.2%
1 year to less than 3 years	30.3%
3 years to less than 5 years	13.6%
5 years or more	12.0%
Average length of time since admission (in days)	876

Source: *Nursing Home Use by "Oldest Old" Sharply Declines*, The Lewin Group, 2006.⁵

The discharge of residents with stays of three months or less doubled between 1977 and 1999,⁶ reflecting nursing homes' increased role in rehabilitative or post-acute care.

Assisted Living

Assisted living communities provide appropriate housing for those who need help in day-to-day living, but who do not need the round-the-clock skilled care found in nursing homes. Many communities have centers for medical care, but the care may not be as intensive as the care provided at a nursing home.

Most assisted living communities create an individual plan for each resident that details the services required. This plan is usually updated regularly to ensure the residents receive proper care as their conditions change.

While the term assisted living is used in many parts of the country, other common terms include:

- Residential care
- Personal care
- Adult congregate living care
- Board and care
- Domiciliary care
- Adult living facility
- Supported care
- Enhanced care
- Community-based retirement facility
- Adult foster care
- Adult homes
- Sheltered housing
- Retirement residence
- Service-enriched housing

Oversight of assisted living communities is primarily in the hands of state governments rather than federal regulation. In 2005, several states strengthened existing standards or implemented new standards for communities with residents with Alzheimer's disease or other forms of dementia. Some states increased training requirements for staff or added disclosure requirements to prospective residents.

As part of the base rate, residents in assisted living communities can usually expect the following services to be offered:

- Care management and monitoring
- Help with activities of daily living
- Housekeeping and laundry
- Medication management
- Recreational activities
- Security
- Transportation
- Two or more meals per day

Some communities, particularly continuing care retirement communities (CCRC) offering multiple levels of care, also charge a one-time entrance fee ranging from \$60,000 to \$120,000⁷ and have additional fees for items such as meal delivery to living quarters, dementia care, or extra transportation services. A growing number of states have begun covering assisted living costs for those low-income individuals who qualify through Medicaid waiver programs, although most residents pay privately or through a long-term care insurance policy.

It is currently estimated that more than 900,000 Americans live in almost 39,500 assisted living residences in the United States.⁸ The average age of individuals living in assisted living communities is 85 and; on average, residents need assistance with two activities of daily living.⁹

Methodology

This survey of nursing home and assisted living communities in all 50 states and the District of Columbia was conducted by telephone during June and July 2007 by LifePlans, Inc. for the MetLife Mature Market Institute.

The states were divided into three groups according to population—under three million, three to ten million, and over ten million. These groupings were determined using data from the 2000 U.S. Census. The cities/areas surveyed within the states were chosen on the basis of population and the ability to obtain a geographically balanced sampling.

In each city/area, a minimum of ten nursing homes/assisted living communities or 15%, whichever was greater, were surveyed. In some states with fewer cities and more dispersed facilities all areas were included and information reported for all zip codes.

As with any survey research, readers should exercise caution when generalizing results in this market survey. The survey should be used as a guide to assist individuals in making long-term care decisions. While we are confident in the research, it is prudent to understand that the results presented in this report are only truly representative of the sample of nursing homes and assisted living communities in the areas surveyed.

Nursing Home & Assisted Living State Criteria		
Population Under Three Million	Population Three to 10 Million	Population Over 10 Million
States Surveyed - 22	States Surveyed - 22	States Surveyed - 7
Areas - 22	Areas - 44	Areas - 21
One city or area surveyed: capital or most populated city (District of Columbia also surveyed)	Two cities or areas surveyed: most populated cities or areas from representative locations in the state	Three cities or areas surveyed: most populated cities and/or areas from representative locations in the state

Nursing Home Methodology

Callers to the nursing homes requested to speak with the Director of Admissions or a comparable professional.

Nursing homes were called at random within each area and were required to meet the following criteria:

- Must be licensed
- Must provide skilled and custodial care
- Most offer a private pay rate for long-term care (custodial care), not the Medicare or Medicaid reimbursed rate

Of the nursing homes that met the criteria, private pay rates were obtained for both private and semi-private rooms. If the nursing home did not meet the criteria, another would be called until a minimum of ten nursing homes or 15% of the homes in that city/area were obtained. Data from 1,239 nursing homes are included in the tabulation.

Assisted Living Methodology

Callers to the assisted living communities asked for the Director of Admissions or a comparable professional.

Communities were called at random and had to meet the following criteria:

- Must be licensed according to each state's standards for licensure
- Must provide personal care assistance
- Must provide private pay rate

Of those communities that met the criteria, monthly base rates were obtained for a one-bedroom apartment with a private bath or a private room with a private bath. Communities requiring entrance fees were excluded from the sample.

Data from 881 assisted living facilities, ranging in size from 7 to 320 beds, were included in the sample; the average number of beds per facility was 63, while the median number of beds was 60.

Summary of National Findings

Nursing Homes

- The 2007 average daily rate for a private room in a nursing home is \$213 (\$77,745 annually), a \$7 or 3.4% increase over the 2006 rate of \$206. In 2005 the daily rate was \$203.
- The 2007 average daily rate for a semi-private room in a nursing home is \$189 (\$68,985 annually), a \$6 or 3.3% increase over the 2006 rate of \$183. In 2005 the daily rate was \$176.
- The national average daily cost of a room for Alzheimer's services is \$197, or \$71,905 annually.
- Annually, private rooms cost an average of \$8,760 more than semi-private accommodations.
- Sixty-five percent of the nursing homes responding provided separate Alzheimer's or dementia units, and only 10% charged any additional fee, with most charging a nominal amount, such as \$5 - \$25 additional per day.
- Seventy-nine percent were freestanding facilities, and 20% had an associated assisted living unit or wing.

Assisted Living

- The 2007 national average, private pay monthly base rate for a one-bedroom apartment with a private bath or a private room with a private bath is \$2,969 (\$35,628 annually), virtually unchanged from the 2006 costs. In 2006, the national average, private pay monthly base rate for a one-bedroom apartment with a private bath or a private room with a private bath was \$2,968, or \$35,616 annually. In 2005, the cost was \$2,905 or \$34,860 annually.
- The 2007 average monthly base rate for Alzheimer's and dementia care in facilities which charge additional fees is \$4,270, or \$51,240 annually. Fifty-nine percent of assisted living communities provide Alzheimer's care up from 48% in 2006.
- Of the 54% of communities charging additional fees for dementia care, the average additional fees totaled \$1,110 monthly. The average rate for facilities that do charge additionally for dementia care is \$4,270 monthly, or \$51,240 annually.
- Base rate fees often only cover some of the total costs of assisted living services, but are also affected by community size. The costs for the most commonly provided services, such as assistance with bathing and dressing and medication management by community capacity, are provided on page 11.

Assisted Living Services Cost and Availability by Community Size

	All communities	Fewer than 25 units/beds	Between 25 and 99 units/beds	100 or more units or beds
Number of surveyed communities	881	145	602	134
% of communities		17%	68%	15%
Average # of units in AL or # of AL beds	63	15	58	133
Freestanding	63%	75%	62%	57%
Average monthly base rate *	\$2,969	\$2,776	\$3,019	\$2,921
Bathing and dressing included	54%	83%	50%	41%
Medication management included	62%	88%	59%	46%
Two or more meals included	99%	97%	100%	97%
ADDITIONAL FEES (all communities, if charged)				
Average monthly cost for medication management	\$348	\$343	\$351	\$337
Average monthly cost for bathing and dressing	\$522	\$395	\$527	\$548
ALZHEIMER'S/DEMENTIA CARE				
Provide Alzheimer's care	59%	52%	60%	59%
Providers Charging Additional Fees	54%	25%	58%	63%
Average monthly cost for Alzheimer's care (for those charging additional fees)	\$4,270	\$3,754	\$4,275	\$4,445

* All communities provide bathing and dressing, medication management, and meal services, but not all include the services in their base rate fees.
